

Chapter Four

Basic Pencil Divisions

Before applying wax lines, draw the basic divisions on the egg with pencil lines. These will be guidelines and will not show later if they are drawn lightly. It is better to make long smooth lines. Do not erase.

The following divisions are used in more designs than any other. Practice until you are comfortable with them.

Basic Division A

1. With pencil, lightly draw a line around the egg vertically, dividing the egg in half.

2. Now draw another line dividing the egg into fourths vertically.

3. Top view of egg when step 2 is completed.

4. Divide the egg horizontally.

Basic Division B

Start with basic division A, and then at the center point, draw lines dividing the egg into 16 equal parts. It should look the same on both sides.

Basic Division C

Start with basic division A, and then at the TOP of the egg, divide the egg into 16 sections with 2 additional vertical lines. The egg will look the same on both sides.

Top view of egg.

Row 1: Egg No. 1, 2, 3
Row 2: Egg No. 4, 5, 6

Row 3: Egg No. 7, 8, 9
Row 4: Egg No. 10, 11, 12

A different view of the same eggs on page 9.

Row 1: Egg No. 13, 14, 15
Row 2: Egg No. 16, 17, 18

Row 3: Egg No. 19, 20, 21
Row 4: Egg No. 22, 23, 24

A different view of the same eggs shown on page 11.
