

Trees and Forests Poster Project

- ❖ Individually or in a group of two you will be creating an informative poster which with different species and samples of tree parts, leaves, twigs, cones, needles and bark or bark samples.
- ❖ You and your partner will need to collect a variety of different samples you will be including and labelling on your poster. You will be required to label everything you choose to include on your poster and when possible, identify the type of tree your sample came from. To do this you will use your tree classification skills.
- ❖ What should I be collecting:
 - Different shape leaves from a variety of trees (at least 5)
 - Think simple, compound, double compound etc
 - Bark samples (if the bark has fallen off the tree) or a shading of the bark pattern or a picture (at least 3)
 - Different types of cones and needles (different bundles and flat or 4-sided)
 - Twigs
 - Anything else to do with TREES!
- ❖ What do I need to label on my poster??
 - Type of tree it comes from
 - All the parts of ONE leaf sample
 - Leaf Type
 - Leaf Shape
 - Leaf Margin
 - Leaf arrangement
 - Needle arrangements and Types
 - Tree bud (or branch)
- ❖ All samples need to be collected and brought to school on Monday, October 1
